KIDS COUNT Project

Data Counts: 2006 National KIDS COUNT Data Book

Utah ranked 6th among all states in a new state-be-state study that reports the well-being of America's children. But the data book is so much more than the rankings. It also provides trend data, simple demographic information, and statistics to help understand what we must do to improve. For example, the information below shows our current rate for several of the indicators as well as the rate of the best ranked state and the 2000 rates for Utah.

Change required to reach the rate of the best state for each indicator.

Indicator	Utah's rate	Best Rate	Utah's 2000 rate
Percent low birth-weight babies	6.5	6.0	6.6
Infant mortality rate (per 1,000 live births)	5.0	4.0	5.2
Child death rate (per 100,000)	21	12	20
Teen death rate (per 100,000)	61	40	60
Teen birth rate (per 1,000 female teens)	35	18	38
Percent teen dropout	5	3	6
Percent teens not in school & not working	6	4	8
Percent children under 18 in poverty	13	10	10

The entire report can be found on-line at www.kidscount.org or by calling the offices of Voices for Utah Children at 364-1182.
